## AMENDMENTS

(currently amended) A tableware clip-on device comprising:

a C-ring adapted to grip an edge of tableware, the C-ring integral with a shaft extending away from a back end of the C-ring, the shaft connected to a ball at a point distal from the C-ring;

the ball supported by an axially mounted pin attached to the shaft at the point distal from the C-ring;

a partially circular cap adapted to movably grip the ball, the circular cap supporting a T-bar on an exterior surface distal from an opening between a pair of ends on the circular cap; and

the T-bar supporting a pair of spreadable lips adapted to hold an ornament or name card so that the ornament or name card is attached by the C-ring to the tableware.

2. (cancelled)
3. (currently amended) The tableware clip-on device according to Claim 1 wherein the C-ring, shaft, T-bar and spreadable lips are made from a molded high strength polymer.
4. (currently amended) A dinner plate clip-on device comprising:

a C-ring adapted to grip an edge of the dinner plate, the C-ring integral with a rearwardly extending

shaft, a distal end of the shaft connected to a ball;  
the ball supported by an axially mounted pin attached  
to the distal end of the shaft;

a means for movably gripping the ball and supporting  
a shelf; and

a means for displaying an ornament attached to the  
shelf.

5. (original) The dinner plate clip-on device according to  
Claim 4 wherein the means for movably gripping the ball is a  
frictionally engaging partial circular member.

6. (original) The dinner plate clip-on device according  
to Claim 4 wherein the means for displaying an ornament is a  
clamping device mounted on the shelf.
